DAIRY OPERATING STANDARDS

Our goal is to manage and operate Pastures of Liberty (POL) with a high standard for cleanliness and sanitary conditions that will ensure a safe and healthy product. Pastures of Liberty operates a RAW dairy and has done so since 2014.

Animal Facilities:

In all aspects of cow facilities and cow handling procedures, the good health of the animal is our ultimate goal. To this end, all facilities are designed and constructed considering cow comfort, cleanliness and capacity limitations.

 □ Cow yards are of sufficient size to ensure no overcrowding □ Cow yards are graded to drain and prevent any standing wards □ Cow yards, sheds, feed alleys and cow holding and traffic clean. □ Waste from the milking parlor and milk handling rooms wards □ Livestock will have access to a source of clean drinking wards 	ater. areas will be kept ill not drain into the
	utci.
Dairy Facilities:	
Milking Parlor: ☐ The milking parlor will have adequate lighting, properly did be adequate ventilation to prevent condensation and to mining and floors will be made of good quality concrete and graded ceilings will be made of a suitably impervious material to encleaned. ☐ All areas of the milking parlor will be kept clean, free of more repair. ☐ Open Air parlor ¾ wall	nize odors. Gutters to drain. Walls and sure they are easily
Milk Room: ☐ A room of sufficient size will be provided for the cooling, milk and the washing, sanitizing and storing of milk containe. ☐ The floor will be kept clean by sweep and mop. ☐ Walls and ceiling will be made of a suitably impervious mare easily cleaned. Converted NSF walk in cooler. ☐ Adequate ventilation will be provided. ☐ All work areas will have adequate lighting. ☐ A separate hand washing facility with hand soap and dispo	ers and utensils.

[s	provided. The milk room and equipment will be kept clean and in good repair. The milk room will have an adequate hot water system for the cleaning and sanitizing of the milk room utensils and equipment and it shall have a stainless steel sink(s) providing adequate compartments for wash, rinse and sanitizing. Compressors, vacuum pumps, and hot water heaters will be housed in a separate m
_	
]	 □ The milking parlor and milk room will be used for no other purposes than dairy operations and shall be kept clean with proper removal of all wastes. There will be no dogs, cats or fowl permitted into these areas. The immediate surroundings of the dairy shall be kept neat, clean and free of conditions that might harbor or be conductive to the breeding of flies and rodents. □ Sanitary toilet facilities will be provided. □ Water for milk room and parlor use shall be from Avondale Water District.
<u>I</u>	Milk Handling Procedures:
<u>I</u>	Equipment: All multi-use containers and equipment, milking systems and other equipment in the handling, storage, bottling, or capping of raw milk or raw milk products shall be made of smooth, nonabsorbent, non-corrodible and non-toxic material, shall be fabricated and installed as to be easily cleaned, shall be self draining and kept in good repair. All single-service articles shall have been manufactured, packaged, transported, stored and handled in a sanitary method. Storage of utensils and associated equipment will be in a sanitary manner. All milk product contact surfaces of multi-use containers, equipment and utensils used in the milking, handling and storing of milk and milk products are cleaned immediately after use with approved cleaners followed by an acid rinse and are sanitized immediately before use. Milking equipment will be maintained in accordance with manufacturer's recommendations and regularly checked to verify proper vacuum levels and pulsator function. Inflations will be changed on manufacturer's recommended intervals.
1	Milking: ☐ Milking will be performed with a closed system milking machine. ☐ The flanks, udders and tails of all milking cows shall be free of visible dirt. All brushing shall be completed prior to milking. ☐ Teats are washed, sanitized and dried using approved methods to promote milk let down and udder health. Teats will be forestripped to check for clinical mastitis and abnormal milk. Milker will be attached within the recommended time of cow prep. Teats will be sanitized after milking.

		onormal milk will be milked l f good milk. Abnormal milk		2
Milk H	andling:			
\square N	filk will be filtered before	ore placement in containers f	or storage.	Milk will be
coo	led to 36 degrees Fahre	enheit within two hours of co	mpletion of	herd milking
and	maintained at that tem	perature until retrieved by the	e owner.	

☐ Distribution containers will be cleaned and sanitized immediately before filling.

☐ Distribution container filling and capping will be conducted in a sanitary manner.

Milk Testing:

- ☐ Milk shall be tested quarterly and at calving.
- ☐ Milk for all lactating cows shall be commingled into a single sample for testing.
- ☐ Tests and limits:
 - o Standard Plate Count < 10,000 CFU/ml (test for all bacteria)
 - o Coliform < 50 CFU/ml (specific test for Coliform)
 - o Somatic Cell Count < 200,000 (basic cow and udder health)

☐ Non-compliance:

- o Raw milk distribution will cease until test results indicate compliance.
- O All lactating cows will be tested individually to determine if one or more individual cows are responsible for the non-compliance. They will be milked last or separately and their milk discarded. Bulk samples from the balance of the herd may then prove compliance and raw milk distribution may be resumed.
- All equipment and facilities will be thoroughly cleaned and sanitized. Equipment assemblies will be disassembled, and all components cleaned and sanitized. Bulk samples may then prove compliance and raw milk distribution may be resumed.

Changes and Additions:

The above set of standards will result in safe and healthy raw milk for human consumption under current general conditions. If new information or changes in current general conditions warrant changes or additions to this document, they may be made when all herd-share owners and POL agree the changes or additions result in an improved situation for the production of safe and healthy raw milk. For example, additional milk quality tests might be added at a later time.
